Root route (`@app.route('/')`):

The screenshot shows a REST client interface with the following details:

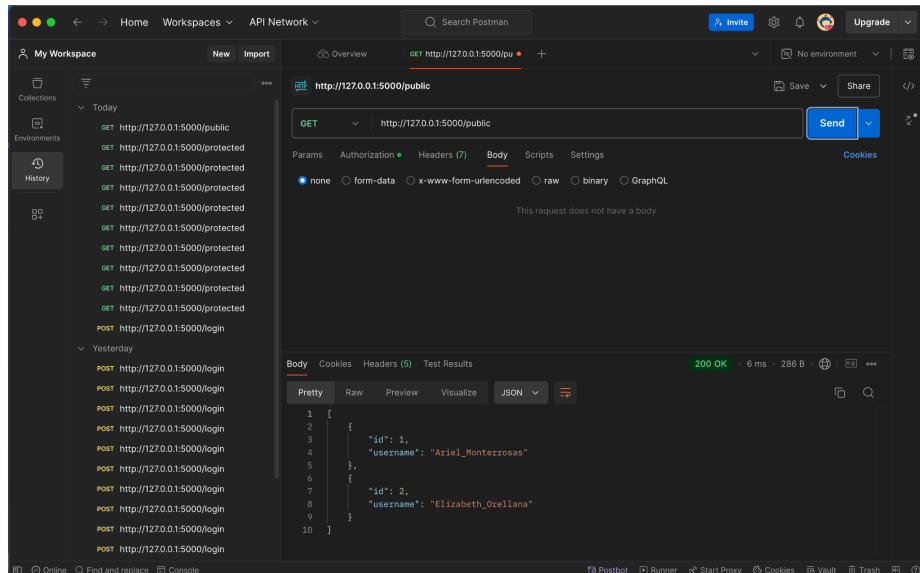

- URL:** `http://127.0.0.1:5000/`
- Method:** `GET`
- Status:** `200 OK` (13 ms, 261 B)
- Body:** JSON response: 

```
{  "message": "Welcome to the Flask App! Try accessing /public, /login, or /protected endpoints."}
```

Key	Value	Description
Key	Value	Description

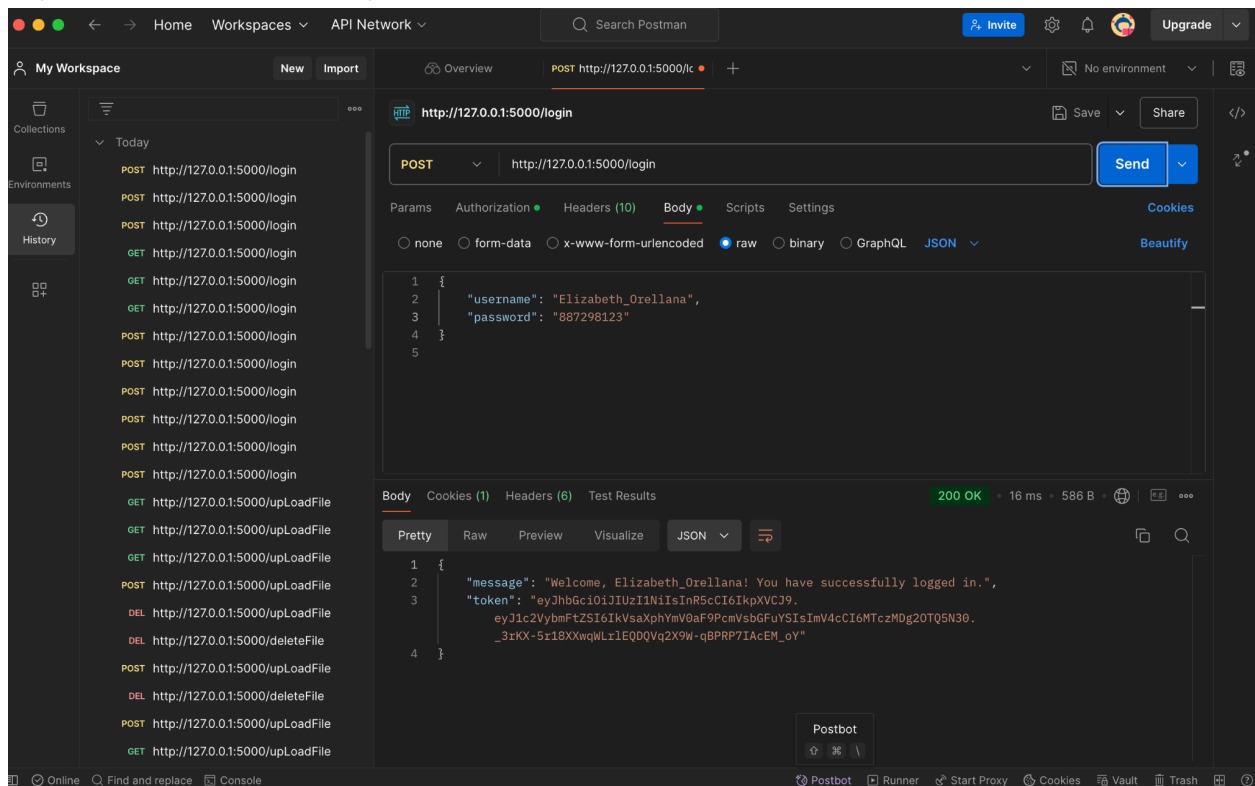

This is the home page. It displays a welcome message and instructions on navigating to the public, login, and protected endpoints.

### Public Route (@app.route('/public')):

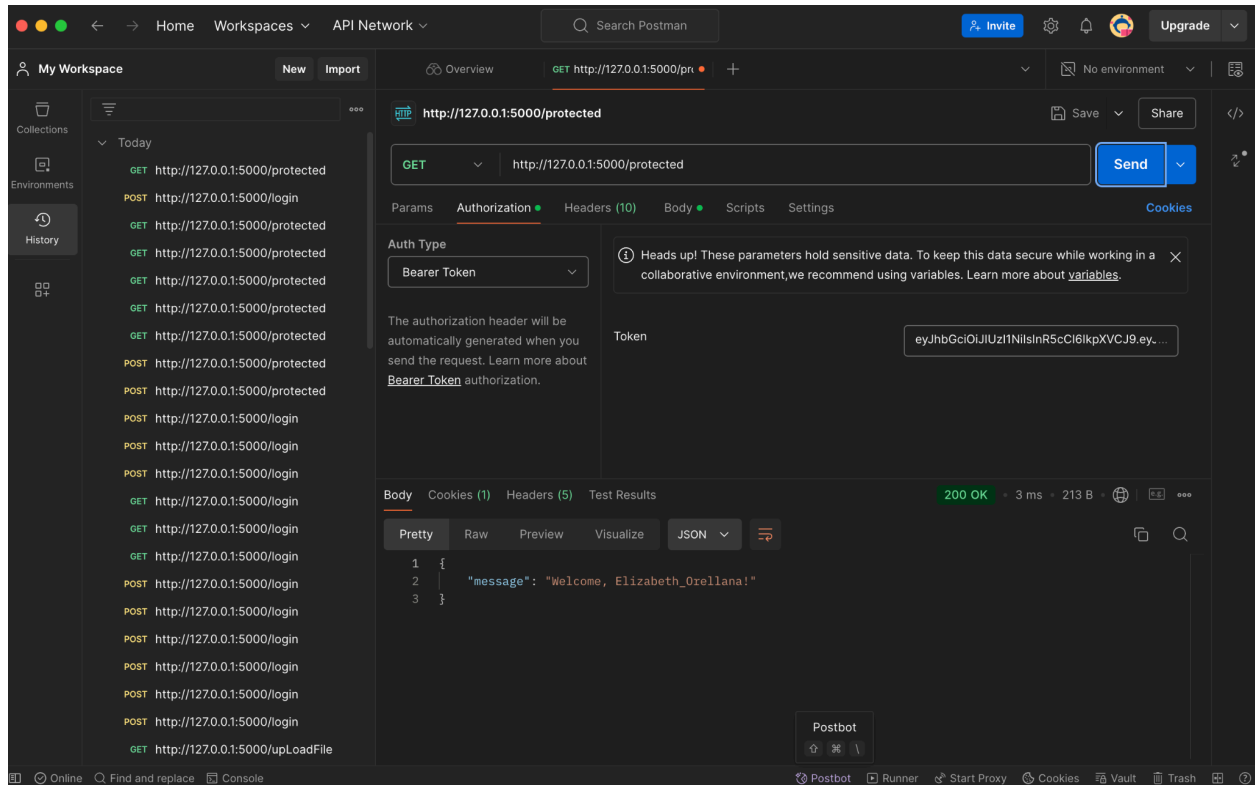

This shows the username and the ID when creating the User Model with MySQL workbench.

### Login Route (`@app.route('/login')`):

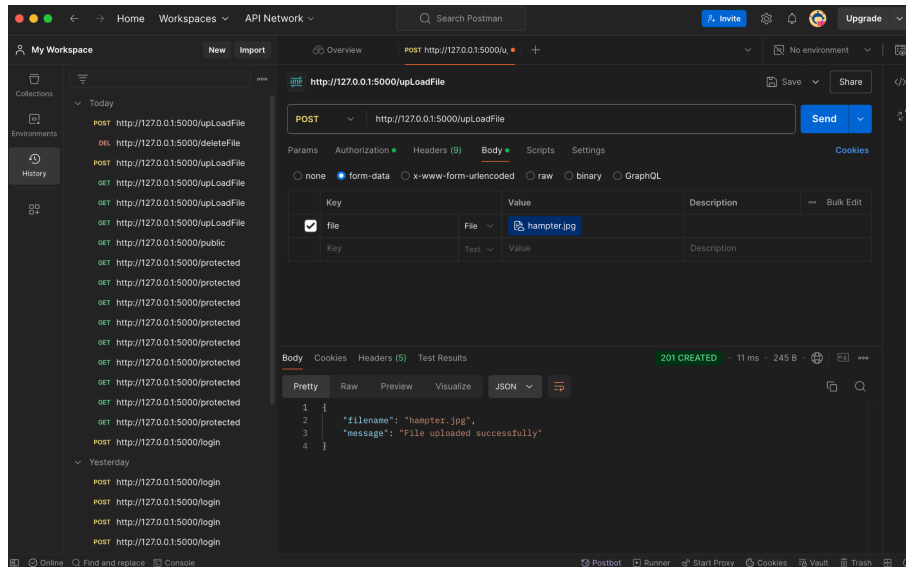

This shows the contents when a user logs in with valid credentials. It has a welcome message and generates a JWT token to access the protected route.

Protected Route (`@app.route('/protected')`):

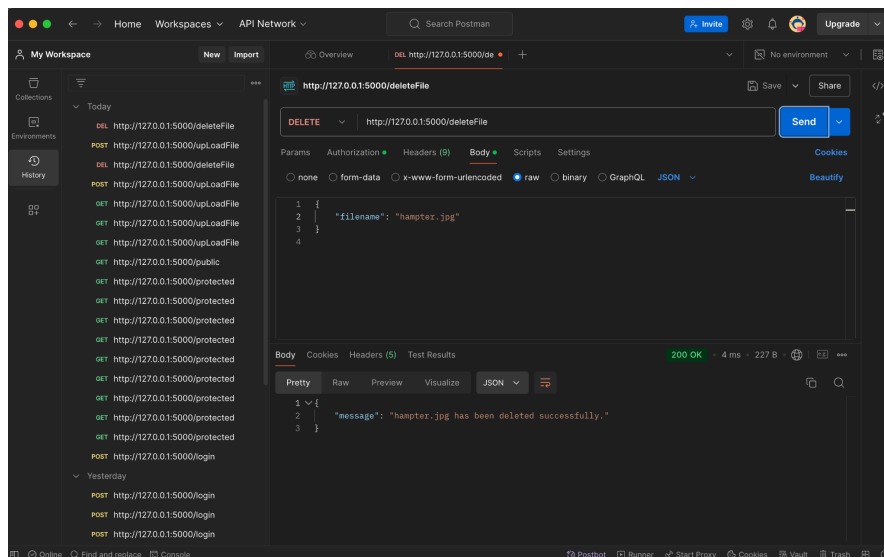

This shows the contents after accessing the protected route using the JWT token generated in the login route. It also displays a welcome message showing you have access to the route.

Upload Route (`@app.route('/upload')`):

This shows a successfully uploaded jpg file.

deleteFile Route (`@app.route('/deleteFile')`):

This shows a successfully deleted jpg file uploaded.
